

ELIZABETH LUGO

Front-End Software Developer

Brighton, CO | (720) 394-1160 | norcross.beth@gmail.com | [linkedin.com/in/beth-norcross-lugo](https://www.linkedin.com/in/beth-norcross-lugo) | [portfolio](#)

SUMMARY

Front-end focused software developer with 5+ years of experience building web-based tools, internal applications, and data-driven interfaces using HTML5, CSS3, JavaScript, and JSON. Combines development experience at Google and Intel with self-directed portfolio projects demonstrating modern responsive layout techniques (Flexbox, CSS Grid) and JSON-driven content architecture. Strong track record automating workflows, improving system performance, and translating business requirements into functional, maintainable code.

TECHNICAL SKILLS

Front-End: HTML5, CSS3 (Flexbox, CSS Grid, responsive design), JavaScript, JSON, DOM manipulation, fetch()/async-await

Languages & Data: Python, VB.NET, SQL (Oracle SQL, GoogleSQL), XML, PHP

Version Control & Workflow: Git, GitHub, GitHub Pages, JIRA, Agile/SCRUM

Dev Environments: VS Code, Visual Studio, PyCharm

Other: API Testing & QA, Requirements Gathering, Process Automation, Data Modeling (Excel/Google Sheets)

PROJECTS

Personal Portfolio Site — elizabeth-lugo-code.github.io/portfolio-site

- Designed and built a responsive personal portfolio site from scratch using HTML5, CSS3 (Flexbox for navigation and hero layout, CSS Grid for a responsive project card layout), and vanilla JavaScript
- Built a JSON-driven resume page using fetch() and dynamic DOM rendering (.map()/template literals), separating content from markup for easier long-term maintenance
- Deployed and version-controlled through Git/GitHub, hosted on GitHub Pages

EXPERIENCE

Front Desk Associate | NFC Amenity Management

Denver, CO • Apr 2026 – Present

- Manage resident records, package intake, and incident logs using Yardi ConciergeIQ and SmartRent, maintaining data accuracy

Career Break | Raising Child at Home

Colorado • Dec 2022 – Apr 2026

- Continued building web development skills independently, including HTML5/CSS3/JavaScript projects and a JSON-driven personal portfolio site

UI Front-End Developer | Google (via Accenture)

Remote / Austin, TX • Dec 2021 – Nov 2022

- Designed and implemented a web-based internal employee management tool using HTML5, CSS, JavaScript, and PHP, improving accessibility and usability of internal data for cross-functional teams
- Improved system performance by 70% through optimization of data processing workflows and backend integrations
- Supported data integration using BigQuery, enabling data-driven functionality across internal systems
- Collaborated with stakeholders to gather requirements and translate business needs into technical solutions

Application Developer | Google (via Accenture)

Remote / Austin, TX • May 2022 – Jul 2022

- Developed a mobile application using AppSheet, leveraging structured Google Sheets data as the backend data source
- Organized and integrated data sources to ensure accurate, efficient data population and user-facing reliability

Workflow Application Developer | Google (via Accenture)

Remote / Austin, TX • Mar 2021 – Nov 2021

- Developed workflow applications in JavaScript- and SQL-based internal languages, aligning implementation with design and content team specifications
- Designed and executed API testing for workflows within the internal Connect Composer environment
- Managed a team through rollout of new internal Connect Composer features and mentored new developers during onboarding
- Automated reporting data-gathering sheets to improve accuracy of sprint reporting to management
- Coordinated development review cycles with peer developers to verify quality before system and content testing

Developer Support Specialist II | Google (via ICONMA)

Remote / Boulder, CO • Mar 2020 – Dec 2020

- Pioneered a multi-parallelism workflow development method to meet accelerated project deadlines
- Developed, tested, and documented blackbox authorable workflows using JavaScript- and SQL-based internal tooling
- Validated incoming project design documents through LucidChart, Google Docs, and Google Sheets
- Validated data integrations through API testing and QA, identifying and resolving system inefficiencies to speed project delivery

Software Developer | Colorado Farm Bureau Mutual Insurance

Centennial, CO • Jun 2019 – Oct 2019

- Built reporting tools using VB.NET and Oracle SQL to simplify daily and month-end account reporting
- Incorporated rollback scripts and version control tracking into deployment documentation

Firmware Developer | Intel Corporation (via Kelly Services)

Longmont, CO • Apr 2017 – May 2018

- Developed and organized Python scripts to process and package firmware data using JSON and XML for multi-customer delivery pipelines
- Coordinated version-controlled firmware package delivery across major customers including Amazon, Dell, HP, and Oracle

EDUCATION

B.S. Computer Information Systems — Web & Game Programming

DeVry University | 2020 | Coursework: HTML5, CSS, JavaScript, PHP, MySQL, C# | Dean's List (2016–2020) | Sigma Alpha Pi – National Society of Leadership and Success

High School Diploma

Brighton High School | Brighton, CO | 2016

CERTIFICATIONS & RECOGNITION

- Employee Excellence Nomination — Colorado Farm Bureau Mutual Insurance (2019)
- Gold Crown, National Yearbook Recognition — Rocky Mountain Journalism (2016)
