

Elizabeth Lugo

Brighton, CO | (720) 394-1160 | norcross.beth@gmail.com | www.linkedin.com/in/beth-norcross-lugo

SUMMARY

Data-focused professional with a background in software development at Google and Intel, with hands-on experience in SQL, Excel, and data-driven workflow automation. Bringing a strong analytical foundation to reporting and data analysis roles, with proven ability to improve system performance, automate processes, and translate business needs into clear, actionable insights.

CORE SKILLS

Data & Reporting: Microsoft Excel (Pivot Tables, XLOOKUP, VLOOKUP, IF/nested formulas, data modeling), Data Cleaning & Transformation, Metrics Analysis, Reporting & Documentation

Databases & Tools: SQL (Oracle SQL, GoogleSQL / BigQuery), Yardi (ConciergeIQ), SmartRent, AppSheet, JIRA, Google Sheets

Technical: Python, JavaScript, VB.NET, Process Automation, API Testing & QA, Requirements Gathering

EXCEL PROJECTS

Spell Efficiency Calculator — Elden Ring (Excel)

- Built a data model to evaluate and rank spells by cost-to-output efficiency ratio, incorporating multiple damage and resource variables
- Used nested IF statements, lookup functions, and calculated fields to automate classification of high- vs. low-efficiency options
- Designed the tool to be reusable and updateable as game variables change — applied the same structured thinking used in business reporting

Dynamic Pricing & Margin Tool — Supermarket Simulator (Excel / Google Sheets)

- Built a formula-driven pricing tool to calculate optimal markup percentages based on cost inputs and target margin goals
- Automated 10–20% markup calculations to eliminate manual entry and ensure pricing consistency
- Structured and maintained a clean dataset to support accurate, repeatable pricing decisions

Household Budget & Expense Tracker (Excel)

- Designed a structured monthly budget tracker with categorized expenses, variance analysis, and running totals
- Applied XLOOKUP and pivot tables to summarize spending patterns and identify areas for adjustment

WORK EXPERIENCE

Front Desk Associate | NFC Amenity Management — Denver, CO Apr 2026 – Present

- Manages resident records, package intake, and incident logs using Yardi ConciergeIQ and SmartRent, ensuring data accuracy across all entries
- Tracks and routes maintenance requests and resident inquiries, maintaining organized logs to support operational follow-through
- Maintains data completeness and consistency in daily shift reports to support management decision-making

Career Break — Raising child at home Dec 2022 – Apr 2026

- Continued building technical skills independently through self-directed Excel projects, maintaining proficiency in data modeling, formula logic, and spreadsheet design throughout the break

Content Creator | YouTube — Remote *Jul 2025 – Dec 2025*

- Produced and managed 50+ videos, using YouTube Analytics to track performance metrics and optimize content strategy
- Analyzed audience engagement data to inform publishing decisions, contributing to 60% follower growth over 6 months

Google (via Accenture / ICONMA) — Austin, TX (Remote) *Mar 2020 – Nov 2022*

UI Front-End Developer *Dec 2021 – Nov 2022*

- Designed and implemented a web-based internal employee management tool, improving accessibility and usability of internal data for cross-functional teams
- Improved system performance by 70% through optimization of data processing workflows and backend integrations
- Supported data integration using BigQuery, enabling data-driven functionality across internal systems
- Collaborated with stakeholders to gather requirements and translate business needs into technical solutions

Application Developer *May 2022 – Jul 2022*

- Developed a mobile application using AppSheet, leveraging structured Google Sheets data as the backend data source
- Organized and integrated data sources to ensure accurate, efficient data population and user-facing reliability

Workflow Application Developer *Mar 2021 – Nov 2021*

- Developed and enhanced internal workflows using JavaScript and GoogleSQL to support data processing and reporting visibility
- Implemented automated tracking solutions that improved team productivity and reporting accuracy
- Mentored team members and supported onboarding through documentation and knowledge sharing

Development Support Specialist II *Mar 2020 – Dec 2020*

- Supported development and maintenance of data-driven workflows, validating data integrations through API testing and QA
- Identified and resolved system inefficiencies, improving performance and contributing to faster project delivery

Software Developer / Programming Consultant | Colorado Farm Bureau Mutual Insurance — Centennial, CO *Jun 2019 – Oct 2019*

- Analyzed and resolved software and data issues using VB.NET and Oracle SQL, optimizing database input and retrieval efficiency
- Developed scripts supporting system integration and collaborated with stakeholders to translate business requirements into solutions

Software Programmer | Intel Corporation — Longmont, CO *Apr 2017 – May 2018*

- Developed and optimized Python scripts to process and organize large datasets related to firmware packaging across multiple customer requirements
- Automated repetitive data workflows, improving operational efficiency and standardizing outputs
- Managed work tracking in JIRA; maintained data integrity using version control tools

EDUCATION

B.S. Computer Information Systems, Software Development 2020

DeVry University | Dean's List (2016–2020) | Sigma Alpha Pi – National Society of Leadership and Success

RECOGNITION

- Employee Excellence Nomination — Colorado Farm Bureau Mutual Insurance (2019)
